

OUR BEST JUST GOT BETTER

GREEN HOME has undergone enormous growth since its inception in 2007. Founded to address a need for sustainable packaging solutions in South Africa, the company spearheaded the widespread local adoption of plant-based, compostable food packaging. The past year has seen some of the biggest growth this fast-growing company has seen yet.

Since being acquired by Bidvest and becoming a division of Bidvest Paperplus in July 2023, GREEN HOME has taken some huge strides.

Being part of Bidvest is allowing the company to do what it does best, even better.

In the past few months alone, all GREEN HOME Double Wall Hot Cups have seen a significant price reduction of around 20%. Low-carbon CPLA Hot Cup Lids have also come down in price by around 13%.

Another range of products to benefit from a price decrease is GREEN HOME's wide selection

of Kraft Containers. This range has also expanded significantly, with a large choice of Bakery, Deli and assorted takeaway trays and containers being added.

Many other new products are also being launched, or in the pipeline to launch soon.

Watch this space to see how GREEN HOME continues providing its clients with the best compostable packaging, with fantastic service delivery.
