BOARDROOMS

The boardroom is where critical decisions are made based on information that is displayed to the directors or executives of the company, it is then very important that the information is displayed clearly and correctly. The boardroom is also the company's showcase facility which makes the look and feel of the room as important as the technology installed within it. With the vast choices of technologies available everything can now be hidden until needed, with projection screens that can be out of view when not in use.

VIDEO AND AUDIO CONFERENCING SYSTEM

With DigiComm's video conferencing solutions, teams can communicate and share information more clearly, IT control video as an application on their IP network and organization vaslty improve the quality of partnerships between employees, customers and supplier. Polycom video conferencing system for conference rooms allow groups to meet naturally over distance, enabling more productive meeting and real-time decision making while reducing costs. Your conference room phone is one of your most valuable collaborations assets. Our audio conferencing solutions deliver the best sound quality with an impressive microphone range to ensure that all your conference call is loud and clear.

WHITE NOISE. FIRE EVAC AND PA SYSTEMS

We are specialist suppliers and system engineers for audio visual presentation solutions for conference venues and boardrooms. Our primary focus is quality and to this end. we offer the world's leading brands in boardrooms and conference AV systems. We also supply the latest in fire evacuation technologies from Ateis international and Penton who are two of the world's premier manufacturer of EN54 - 16 and BS5839 - Part 8, certified voice evacuation productions. The installations of white noise open-plan offices and call-centres help reduce the overall noise pollution of that area. By masking human speech and ambient noise levels, individuals are less aware of noise around them.

BOARDROOM AUTOMATION

Now final aspect that will complete your boardroom installation; a sleek and sophisticated touch panel that will control all the technology in the room, no more getting up to switch on and off lights between use of the projector, or trying to figure out which remote controld which technology. Now everything is combined into on controller making life easier and giving a real professional edge.

DIGITAL SIGNAGE

Digital signage is a form of electronic display that can be used to advertise or display a wide variety of information. A benefit of Digital signage is that the imformation can be changed at any moment to match location, target audience or time. The information is maintained remotely so you define from your office what message you want to show to what target group, at what time and where.

RESIDENTIAL SERVICES

CINEMA ROOMS

To ensure you get the best possible experience from your cinema room the key is to getting everything right at the design stage, with DigiComm's hands-on approach we can help and advise you on every aspect from the design, installation and implementation of your home cinema room.

ACCOUSTIC TREATMENT

Acoustic Treatment is a very important aspect of your home cinema room. With the use of wall panels or acoustical foam to treat the walls, interior door panels that stop the sound from escaping into the rest of the house and specialised ceiling treatment, you will have no problem keeping the noise you don't want out and the sound you want inside for ultimate viewing and listerning pleasure.

LIGHTING

The lighting in your cinema room can set the ambience and give you that real cinema effect. You can mix the light from lamps, in celling fibre optics, LED feature lighting and spot lights to set the perfect level for your mood

PROJECTORS

At any time, there are many models and brands of projectors and making the choice between these may seem daunting. With all these projectors offering their unique benefits and ranging in price and quality we will help you make an informed decision in purchasing the best projector for your home cinema room

SOUND

Selecting the correct sound system is vital for your home cinema room. Great sound can really bring out the power of high definition video, and correct speaker placement is essential to experiencing the true impact of movie, music and games

SCREEN

The screen you select is very important in the design of your home cinema room. A screen that is either to large or too small for your room will leave you disappointed and unhappy with the result. With all the options, out there we advise you on the best option that will leave you satisfied and match your budget requirements.

SEATING

With the amount of time you will be spending in your home cinema room you cannot afford to compromise on comfort. You can customise your home theatre seating to match your individual taste and style with a wide range of colours, designs and layouts. Perfected to fit your needs and your cinema room no matter how big or small.
