COMMERCIAL POWER SOLUTIONS

At GC Solar, we understand that businesses demand energy solutions that go beyond the ordinary. That's why we offer an exceptional range of commercial solar solutions tailored to meet your specific needs. Our cutting-edge products and expert services empower your business to thrive in an energy-efficient and sustainable future.

**SUB-SAHARAN
AFRICA**
College of Technology
www.ssac.tech

In 2022, Sub-Saharan Africa renewable Energy Training Academy was established to uplift the quality of solar professionals in South Africa and Southern Africa. With officially recognized Photovoltaic associations our courses are accredited and provide skill development and expertise of emerging engineering companies.

This will contribute significantly to developing local talent and addressing the shortage of engineering skills in South Africa. As these companies develop new skills, and as the renewable sector expands, they will look to expand their companies and in doing so, will create new jobs in the rapidly expanding renewable energy sector.
