Apollo Instrumentation to Showcase Smart Hospitality Technologies at Hotel & Hospitality Expo Africa 2025

Cape Town, South Africa- May 21, 2025- Apollo Instrumentation, a South African leader in integrated ICT systems for the hospitality and leisure industry, is proud to announce its participation in the upcoming **Hotel & Hospitality Expo Africa 2025**, taking place at the **Cape Town International Convention Centre (CTICC)** from **11–12 June 2025**.

Apollo will be showcasing its most innovative products:

*Authen*TIC'8™ and *TRAC'8*- each built to meet distinct operational needs in high-demand guest environments.

What You'll Experience at the Apollo Exhibit

*Authen*TIC'8™ is Apollo's advanced platform for smart access and transaction management. This modular system offers:

- **Seamless Contactless Access Control**
- **Integrated Digital Ticketing and Booking**
- **Cashless Payment Enablement**
- **Smart Locker Connectivity**

*Authen*TIC'8™ enhances operational efficiency while elevating the guest experience across venues such as waterparks, resorts, and entertainment centres.

TRAC'8, in contrast, is a dedicated **asset tracking and stock management system**. It delivers:

- **Real-time asset visibility**
- **Inventory tracking and reporting**
- **Reduced loss and improved asset control**

TRAC'8 is ideal for hotels, kitchens, conference venues, and leisure environments with dynamic inventory and equipment movement.

A Message from the Director

"Our mission at Apollo Instrumentation is to empower hospitality operators with technology that's both intuitive and impactful," says **Vinesh Harpal**, CEO of Apollo Instrumentation. "By separating our systems into specialized platforms like *Authen*TIC'8™ and *TRAC'8*, we allow venues to integrate only what they need- and scale as they grow."

About Apollo Instrumentation

Established in 2017 and based in Johannesburg, **Apollo Instrumentation** designs and implements scalable ICT systems for the hospitality, tourism, education, and security sectors. By combining software, hardware, and infrastructure, Apollo delivers smart environments that are efficient, secure, and guest-centric.
