SMART LOCKER SOLUTION

APOLLO INSTRUMENTATION

INNOVATING THE WAY INTO THE FUTURE

Adopt a more agile way of working: The way we work, interact, collaborate and socialise is changing. With our smart lockers, you can safely store personal or work-related belongings with client stipulated access tools, by means of existing access cards, key fobs, armbands and tags. Our lockers can be remotely managed, monitored and controlled via a dashboard – rendering our intelligent locker solution ideal for any corporate or leisure environment

*Shared spaces with smart locker solutions meets
the needs of today's society*

OUR VISION

To provide revolutionary high-quality intelligent locker solutions that stimulates agile environments.

Corporate spaces

Have you thought about adopting lockers in your workplace?

Positioning a bank of lockers for staff negates the need for stowage on new and improved multifunctional flexible work floors and provides for safe and secure individual storage. This modern and progressive process provides additional informal work spaces to your employees. A higher percentage of We/Owned and We/Shared workspaces promotes mobility in the workplace, advocating for the social distancing requirements moving forward. Our Smart Locker solutions meet the storage needs of new modern spaces, without consuming premium office rentable space. It provides a secure, reliable place for employees to store their personal belongings, laptops and other supplies and equipment.

Fluid workstyles calls for smart locker solutions

Medical & Pharmaceutical spaces

Our Smart Locker solutions can be tailored to the pharmaceutical and medical industry for safe storage, access per authorized permissions and audit trailing of medication that requires strict control measures prior to such medication being dispensed. Our lockers are fully configurable and can be used by various users. The solution works well within dispensaries where medication would be placed in a locker for collection by patients, thus reducing the risk of infection being passed between patients and pharmacy staff.

Fitness & Leisure

Provide your staff, guests and patrons with the option to safely and securely store their personal belongings — giving them a peace of mind to enjoy their visit to your facility. Our networked locks and software can be integrated into 3rd party software making your guest experience seamless.

Our simple to use and easy to manage smart lockers are available with either basic or advanced functions to tailor the management of the system to operational requirements

ADVANTAGES OF SMART LOCKERS

Technology has people depending on various electronic gadgets like tablets, computers, and mobile phones to carry out different tasks. The increased use of these gadgets, has made lockers indispensable to enable employees, guests and patrons to store their personal belongings safely and securely whilst not in use.

Convenient and easy to use locking systems by means of the following technology:

- RFID
- QR CODE
- BARCODE
- KEYPAD
