Perseo by BTV Group

Who we are

Perseo is the exclusive business line of the **BTV Group**, developed specifically for the hotel sector. This authentic and distinctive brand stems from the deep knowledge accumulated over **40 years** of experience in manufacturing hotel equipment.

Perseo combines design, innovation, and technology, backed by the quality guaranteed by a **Group** with over **60 years** of experience in the sector.

Mission

At **Perseo**, we offer cutting-edge technology for the hospitality industry. Our mission is to provide high-quality equipment solutions that ensure guest **comfort and safety**, exceeding expectations and contributing to our clients' success.

Vision

To be recognized worldwide as leaders in **design and innovation**, and the first choice for the hotel sector.

Values

Commitment to Quality

Continuous Innovation

Integrity and Transparency

Certifications

ISO 9001 Certificate
since 24/02/1999

ISO 14001 Certificate
since 15/12/2010

Our solutions

Access control

Electronic locks with RFID technology and centralized management software.

Safes

Variety of electronic and mechanical models, large and small, for any type of hotel.

Minibars

Absorption, thermoelectric and compressor technologies, adapted to every budget.

Accessories

Kettles, trays, hairdryers and more.

Smart lockers

To complete the experience.

Smart lockers for hotels

A safe and practical solution for storing luggage

Enhance your guests' experience

- Kuik Smart Lockers are easy to use, secure, and modern.
- **No waiting:** Guests can drop off or pick up their luggage without relying on staff.
- **Total convenience:** Access to luggage at any time during your stay.
- **Guaranteed security:** Controlled system that protects luggage.
- **Ideal for today's travelers:** Fast, practical and adapted to today's needs.

Kuik
Smart Lockers

Transform baggage handling

24/7 Standalone Access

Guests can drop off and pick up their luggage without staff intervention.

Guaranteed Security

Maximum protection for belongings with a smart lock system.

Space Optimization

Make better use of the hotel's common areas with an efficient and attractive system.

Main technical features

- **Advanced electronic lock:** Access via code, RFID card, or app.
- **PMS integration:** Connects to the hotel's system for centralized control.
- **Remote management:** Monitor and manage from any device.
- **Customizable sizes:** Adaptable to different types of luggage.
- **Intuitive interface:** Touchscreens guide guests.

Improves the hotel's operational efficiency

Improves the guest experience

- No waiting or complications.

It reduces the workload of the staff.

- Eliminates manual baggage handling.

Increased security

- Less human intervention, which minimizes errors.

Optimize the space

- Modular system that adapts to your needs.

Discover how Kuik Smart Lockers can transform your hotel

Access control

Comprehensive solution for hotel management

- Access control system adaptable to any type of hotel.
- It operates **wirelessly online**, allowing **real-time communication** with the locks.
- It simplifies property management with remote access.
- It can also operate offline, ideal for installations that don't require real-time management.

System components

Smartway Connect by Perseo

Web platform that centralizes access management and allows you to configure schedules, permissions and audits in an intuitive way.

Electronic locks: Privy, Lux & Hermes

Smart locks that allow access via RFID cards, wristbands, mobile phones or numeric codes, guaranteeing maximum security and convenience for guests.

Wall readers

Installed at strategic points, such as main entrances and restricted areas, Perseo wall readers facilitate smooth and secure access control in key areas.

Gateways

They allow direct communication between electronic locks and Perseo software, with a wide coverage range and reducing installation costs.

Miniserver

Compact, plug-and-play device that manages cloud backups and allows remote access without the need for a static IP address or VPN. Compatible with Windows.

Energy savers

Perseo devices that control lighting and air conditioning, optimizing energy consumption and efficiently reducing operating costs.

RFID keychains, cards and wristbands

Access devices designed to integrate seamlessly with the Perseo system, allowing convenient and secure access to authorized rooms and areas.

Card encoders

An essential tool for the quick and efficient management of new RFID cards from reception, fully integrated with the Perseo platform for precise control.

Audit controls

They allow you to review and audit all access logs, providing complete and detailed control of door openings in the Perseo system.

Smartway Connect

Access management platform

Web App

Web application accessible via browsers on reception and from any device with an internet connection, without the need to install any APP and without registration.

Simple Integration

Easy connection with third-party systems (PMS, BMS, kiosks, auto check-in) via API.

Enhanced IP Security

Devices accessible from anywhere in the hotel using IP technology.

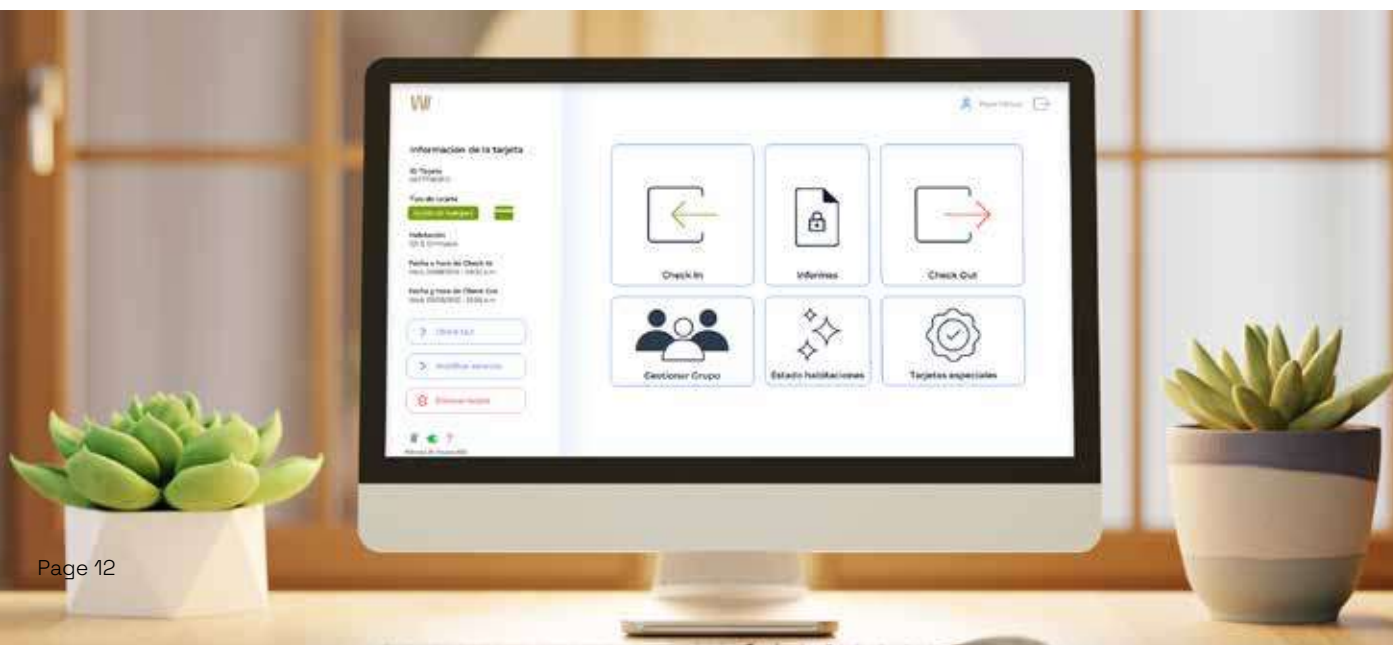

Various Access Methods

Access options: mechanical key, RFID card, mobile, numeric key and others.

Miniserver Plug and Play

Independent system management, avoiding interference and ensuring stable communications.

Privy

Minimalist design

The Privy electronic lock combines a **minimalist design** with advanced Smartway Connect technology, ideal for hotels seeking **elegance** and **functionality**.

- | | |
|---|--|
| ✓ | Hidden reader and integrated components |
| ✓ | Smartway Connect technology |
| ✓ | AISI 304 stainless steel handles |
| ✓ | Anti-tamper handle with free rotation |
| ✓ | Emergency mechanical lock |
| ✓ | Tropicalized electronic circuit |

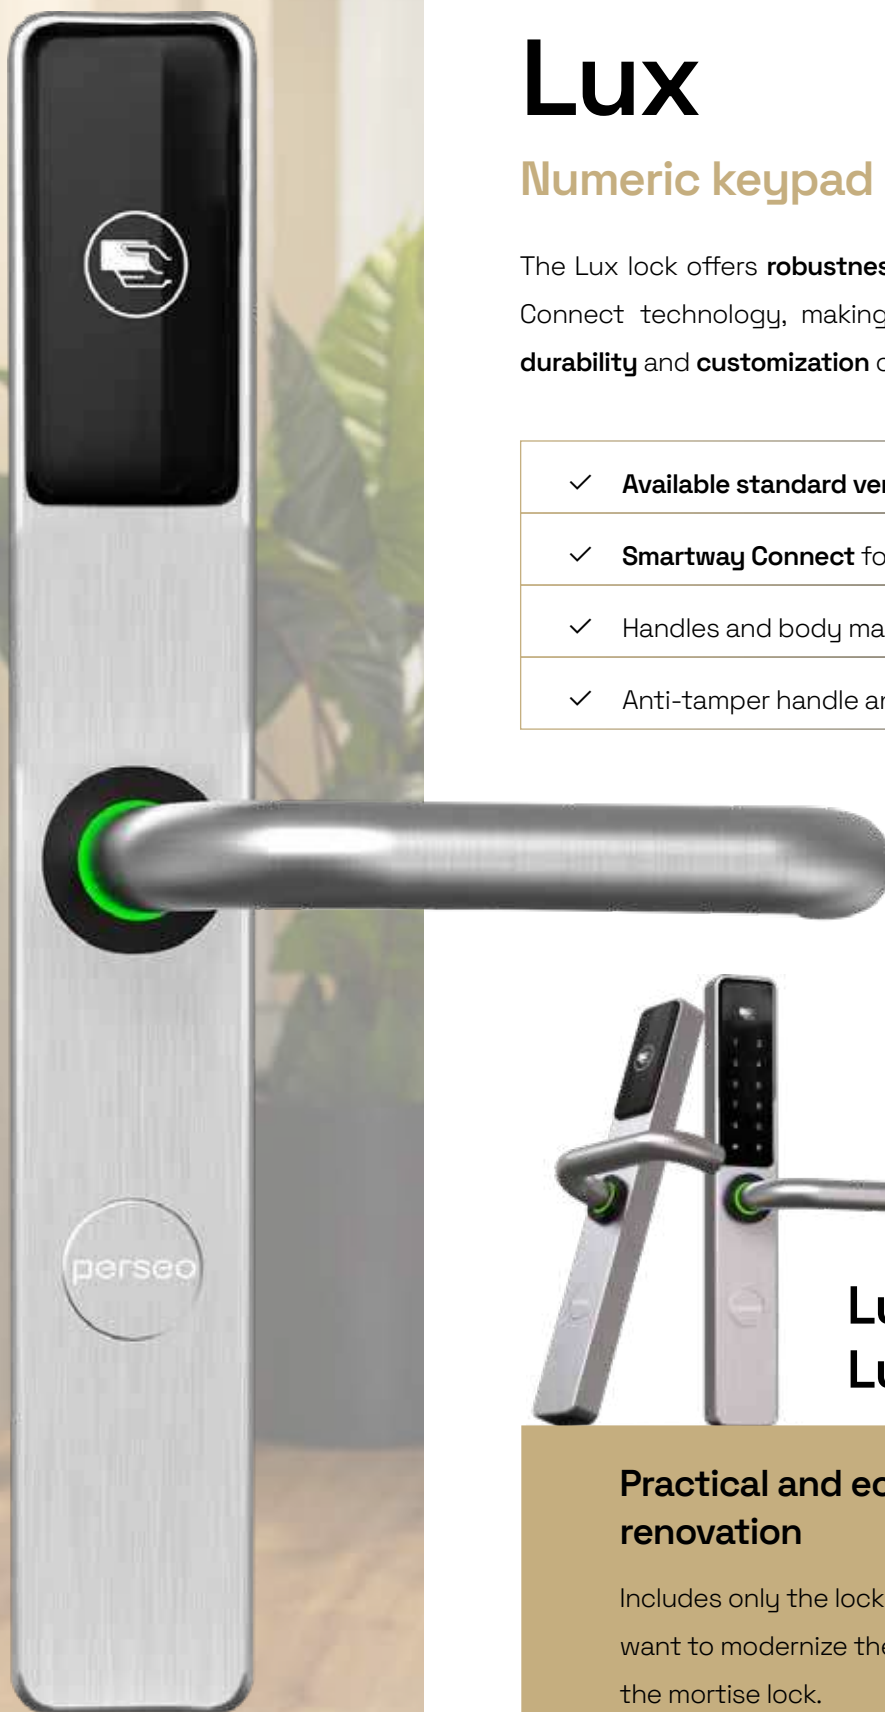

Centralized management with Smartway Connect

- **Online mode:** Unlimited real-time audited monitoring and logging.
- **Offline mode:** Audited record of up to 1000 events.

Features

- **Audit of up to 1000 events** with emergency opening log.
- **Tropicalized circuit** for high durability in humid environments.
- **Software control**, with standalone or centralized management options.
- **Concealed mechanical emergency lock** under a tab.
- Automatically retracting **panic latch**.
- **RFID system with card** access.
- Software-configurable **unlocking option**.
- **EEPROM memory** that retains settings when batteries are changed.
- **Low battery alert**.
- Operates on **4 AAA batteries**.
- **Anti-friction system** for quiet operation and anti-card latch.

Lux

Numeric keypad option

The Lux lock offers **robustness** and **versatility** with its Smartway Connect technology, making it perfect for hotels looking for **durability** and **customization** options.

- | | |
|---|--|
| ✓ | Available standard version and version with keyboard |
| ✓ | Smartway Connect for opening via mobile |

- **RFID system** with card access.
- Software-based **unlock** configuration.
- **EEPROM memory** retains settings when batteries are changed.
- **Low battery alert**.
- Operates on **4 AA batteries**.
- **Anti-friction system** for quiet operation and **anti-card latch**.
- Door ajar **detection sensor**.

Accessories

Wall readers

- Access via MiFare card, PIN, or app.
- Stores up to 889 cards and allows for temporary access management.
- Features a keypad with masking and alarms for malfunctions or tampering attempts.

Economizers

- RFID technology for electricity control.
- Enables recognition of any contactless card.
- Recognizes cards assigned to the room and verifies if the stay is still active to authorize or deny electricity usage.
- ISO 14443A RFID communication protocol.

RFID Credentials

- RFID technology for identification and access control.
- Available in card, wristband, or key fob formats.
- Security guaranteed with system encryption.
- Customizable with hotel logo or image.

Mini server

- Server for Smartway Connect.
- Plug & Play, installation without additional cables.
- Cloud backup control.
- Operational status monitoring.
- Dimensions: 197.4 x 126.3 x 47.5 mm.

Installation requirements

Adequate ventilation: It is essential to ensure proper airflow for optimal minibar operation.

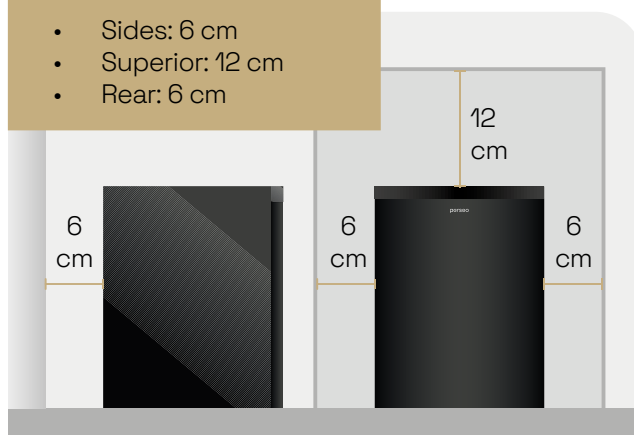

- **Lack of ventilation reduces performance, increases energy consumption, and shortens the lifespan of the minibar.**

- a. equal to or greater than **6 cm** except Glow: **11 cm**
- b. equal to or greater than **12 cm**
- c. equal to or greater than **5 cm**

Minimum measures:

- Sides: 6 cm
- Superior: 12 cm
- Rear: 6 cm

Maintenance

Recommended monthly cleaning:

- Clean the minibar once a month.
- Use a damp cloth.
- Avoid using harsh chemicals that could damage the components or the interior.

Winter

Automatic, silent and efficient defrost
