

ORENZO

Iron Cactus Sculpture Collection

A photograph of a modern outdoor patio area. In the foreground, there is a white metal railing with a decorative pattern. To the left, there are large green plants. In the center, there is a small rectangular pool with a large cactus sculpture in the middle. To the right, there is a white lounge chair and a large cactus sculpture. The background shows a hillside with houses and a clear blue sky.

Handcrafted iron sculptures made in Morocco. Each piece is formed by hand, finished with care, and built to endure both indoor environments and open-air settings. This catalogue presents the complete collection with dimensions, finishes, and pricing.

Each sculpture in the Orenzo collection is handmade in Morocco using hand-worked iron, shaped to replicate the bold geometry of desert cacti and succulents. Designed to anchor patios, courtyards, and interiors, these pieces bring quiet drama to any setting — indoors or out. Available in multiple sizes and a curated range of finishes. Each piece is unique and may carry minor variations in finish and form — a mark of their handcrafted origin.

ABOUT FINISHES

Each cactus model can be selected in different colours: Vert Naturel, bleu Orenzo, rouge Old Glory... The Hohokam and Aloe collections are particularly enhanced by Old Glory and Vert Naturel. Agaves, Globo, Kumi, and Opuntia illuminate gardens and dry patios in all colour variants. Vert Naturel recreates natural dry landscapes across all variants.

ALOÉ COLLECTION

Rosette-form iron sculptures inspired by the aloe plant. Layered, pointed leaves radiate from a central core — equally suited to a garden bed or a minimal interior.
