Biophilic design is a concept used within the building industry to increase occupant connectivity to the natural environment through the use of direct nature, indirect nature, and space and place conditions. Used at both the building and city-scale, it is argued that this idea has health, environmental, and economic benefits for building occupants and urban environments, with few drawbacks. Although its name was coined in recent history, indicators of biophilic design have been seen in architecture from as far back as the Hanging Gardens of Babylon.

Create a space that people love to be in.

Intentionally specifying the beauty of plants, live green walls and art into your space helps create an inviting environment.

Bringing the outdoors indoors is a skill and a passion that Execuflora has shared with professional designers, architects and facility managers for more than four decades. Our plant technicians maintain more than 120,000 plants in the field in Gauteng, and we have branches in Durban, Eastern Cape and Cape Town.

Sustainable supply of plants, eco-bark chip, recyclable pots and **locally sourced** product is key to our business.

As per your
specification

Steel-frame planters create lift and a sense of spaciousness in the installation of plants in your space.

Bespoke planters can be made to your specification, taking standard plant liner sizes into consideration.

measure

Live Green Walls

LIVE GREEN WALLS

LUSH FROM THE START

Execuflora's live green walls are installed in a honeycomb design. The 'nesting' pattern of installation allows mature plants to be installed, ensuring a full, impactful green wall from the day of installation. Our modular design is scalable. Our largest green wall is W10m x H15m.

Short term events

STANDARD SHORT TERM RENTAL PLANTS & POTS

Shapes: Cylinder, Tapered round, Tapered square, Cube

W: 300/400/550/700mm
H: 450/600/800/1000mm

FREESTANDING GREEN WALLS

and spark to your space.

Bringing the Outdoors Indoors

Commissioned Art

As per
your brief

Commissioned art is available in abstract acrylic. On confirmation of colour and size required, a small painted sample is provided for signoff.

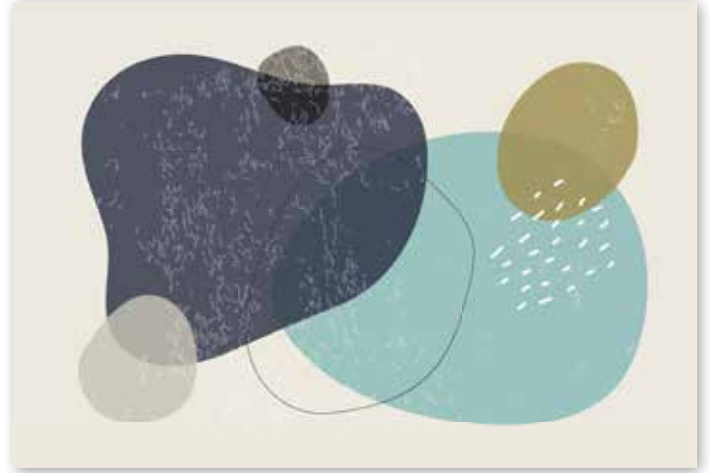

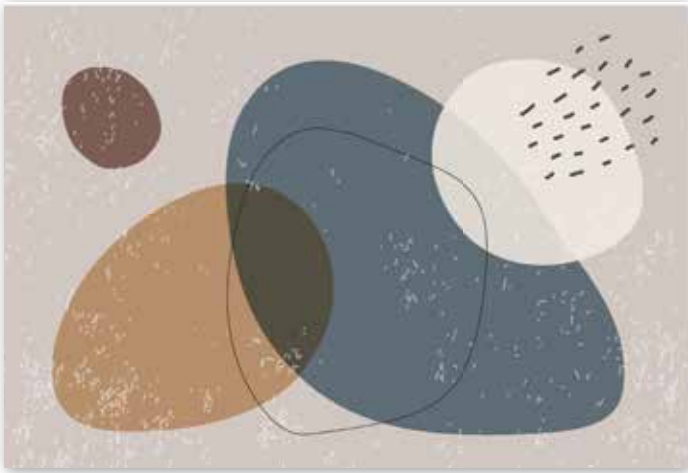

Extensive
range

Photographic art is available in the following categories:

[Abstract](#) | [Landscape](#) | [Seascape](#) | [Cityscape](#) | [Botanical](#) | [Wildlife](#) | [Food](#) | [Trees](#) | [Water](#)

Art Prints

Plants - low light

A photograph of a modern office courtyard. The space is filled with large, leafy green trees and various plants. In the foreground, there are several armchairs: two orange ones and several green ones. The background shows a multi-story office building with large windows and balconies. The overall atmosphere is bright and airy, with natural light illuminating the space.

Plant selection

Our team will recommend the best plants for your space to ensure that your interior plantscaping thrives.

A large, lush indoor palm tree stands as the centerpiece in a modern restaurant. The tree has multiple green trunks and dense, feathery fronds that reach towards a ceiling with horizontal wooden slats. To the left, a wooden lattice screen and a counter with brass bowls are visible. To the right, a dining area with dark tables and chairs is partially seen. Sunlight filters through the leaves, creating patterns on the floor and furniture.

General information

PLANT MAINTENANCE

Our professional plant technicians service your plants on a rotational basis. This includes watering your plants, removing dead leaves, dealing with plant health, and replacement of plants that are below standard, at no charge.

CONTAINER MATERIALS

Polyethylene
Fibreglass
Moulded plastic
Mild steel
Aluminium
Wooden cladding with aluminium inner
Hand-thrown pottery

COLOURS

Steel and moulded pots are sprayed in colours as per customer specification. Steel pots are also powder coated, on request. RAL and Pantone colours are available.

DELIVERY

Delivery subject to availability and material used. 2 - 6 weeks.

SUSTAINABILITY

Execuflora uses eco-bark as a decorative mulch in our plantscaping. Where possible, we use recyclable pots.

PROUDLY SOUTH AFRICAN

We are a proudly South African company, using local suppliers and locally-sourced materials.
